INFORMATION FOR PURCHASERS

WHEN YOU ORDER. please use the printed envelope and order sheet enclosed. Always write your name the same, adding the postoffice, county and State on each and every communication you send us. If you have occasion to write us, please use a separate sheet.

LOST OR UNSIGNED ORDERS. Letters are often sent us unsigned and letters are sometimes lost in the mails. If you do not hear from us within a reasonable time, please send us a duplicate of your order, stating when and in what form payment was sent and sign the name and address the same as in the first order, so that it may have immediate attention.

HOW TO SEND MONEY. Our terms are cash. To avoid delay, please send money with order. Money may be sent at our risk if forwarded by P. O. Money Order, Express Money Order, Bank Draft or in Registered Letter, and cost of same may be deducted from amount forwarded; but we can not be responsible for any order or money that fails to reach us when not sent as above directed. CASH should be sent by Registered Letter, but coins should be carefully wrapped and care taken to seal letter securely. New postage stamps accepted.

OUR GUARANTEE. We guarantee all our plants to reach their destination in a good growing condition. Do not be confused with senseless guarantees which mean nothing. This is our Guarantee. Furthermore, we guarantee that when goods are received, if they are not thoroughly satisfactory, we will make them so or refund your money. When plants reach you in good condition and are planted with ordinary care, there is no difficulty in guaranteeing them to bloom at the time nature intended they should. Vestal's plants are guaranteed to reach you in first-class condition, and if you give them any kind of care, we guarantee them to grow and bloom.

OUR RESPONSIBILITY. As stated, we guarantee all goods to reach their destination in a live condition, but when we have done this, our responsibility ceases, because we know that if they receive proper treatment they will grow nicely. Many plants die from careless treatment and neglect; in such cases we can not and should not be expected to replace them.

ERRORS. As an evidence of our human failings we sometimes make mistakes. Careful as we are to protect ourselves and our patrons, preach as much as we will to our employees, yet they occur; when they do, notify us at once; we will correct them promptly.

WHEN SENDING CLUB ORDERS, please give full name and address of each member of the club, so that we may enter their names on our books and forward them our Catalogues as issued.

ORDERS BY EXPRESS. Two year old roses, large size shrubbery, fruit trees, etc., are too large to mail and must be sent by express. We recommend that customers instruct us to ship smaller size plants also by express, when in our judgment it is best to do so. We can send larger plants this way and can leave most of the earth on roots, which is of course much better for our customers. Express charges must be paid by the purchaser, unless otherwise agreed. But we are careful to pack as light as safety of the plants will permit and add as many extras as we can afford to help cover charges, and since the expressage on plants, bulbs, etc., is now twenty per cent less than regular merchandise rates, the cost of sending goods in this way, even to distant points, is quite reasonable.

PARCEL POST

Heretofore the limit of weight of a package of mailable plants, bulbs and seeds has been four pounds. The newly established system of Parcel Post simply gives the added privilege of transferring through the mails packages of mailable plants, bulbs, seeds, etc., of weight up to twenty pounds. Do not construe this to mean, however, that the increased size of packages allows carrying express size plants. It only permits of sending you larger orders of mailable plants. Don't request blooming plants with soil attached to roots sent by parcel post. It can't be done.

The firm of VESTAL & SON has no connection whatever with any other concern in Little Rock or elsewhere, but is the old original firm established on this present site by its founder, JOSEPH W. VESTAL, in 1880. Letters addressed to VESTAL, LITTLE ROCK, ARKANSAS, will reach us.

50 YEARS OF
ROSE GROWING

VESTAL ROSES AND HOW TO GROW THEM

Who Should Plant Roses

Everyone should plant roses. There is no home, worthy of the name, where space could not be found for from ten to one hundred rose bushes. If a renter, plant roses; you will get returns in beautiful flowers in from two to three months. If a flat dweller, and you have three or more windows, you can plant ten or more rose bushes in window boxes. The results will be a delight, and you can move the window boxes with other personal belongings, when moving day comes around. If a home owner it matters not how pretentious or humble, nothing can make it more home-like, more attractive and inviting, than a well selected rose planting. If a landlord, there is no improvement that can be made at so small an expenditure that will so quickly enhance the rental value and desirability of property, insuring permanent tenants, as a good rose planting.

Roses are the most popular flowering plant grown. As either plants or flowers, they may be properly and effectively used for a great number of purposes. In the southern states roses may be had in abundance nearly the entire year; longer than any other flower. We can never have too many roses around our homes; we seldom have enough.

The mild winters, long fall and spring seasons, and abundance of rain during the summer, give the lovers of roses in the southern states a more ideal climatic condition for growths in the yard or open bed than any section of the world.

SOIL. If the soil is naturally well drained, it will be unnecessary to provide drainage. But nothing is more prejudicial to the health of Roses than poorly drained soil; therefore, if needful, provide drainage. Dig a trench to the depth of 2½ feet, and in the bottom deposit a 4 or 5-inch layer of drainage material so that all surplus water will drain away quickly. It is a good idea to mix with the soil in the bottom of the trench a few broken bones, say a peck, for a bed holding a dozen Roses—they will furnish plant food for the Roses for three or four years to come. A rich, deep clay loam is the best soil. If it contains grass roots, or is made up of rooted sods, all the better; any ordinary soil will answer, providing it is well manured.

MANURES. While manure from the cow-stable is probably best, you can draw upon the horse-stable or pig-sty with equal expectation of good results. Well-rotted leaves are fair, but too light except for heavy soils. Commercial fertilizers, such as bone or guano, may be used to advantage if handled with discretion. A rule to remember is never to let any "green" or "raw" manure come close to the roots of your Roses, but see that it is buried well beneath the root reach, or applied as a top-dressing.

The best time to apply manures is just as the ground begins to freeze in the autumn; let it serve as a protection over winter and dig it in next spring. Even with the best care it may prove necessary at times, say after six or eight years, to renew the Roses or move the bed, adopting the farmer's principle of rotation of crops.

TREATMENT ON ARRIVAL. When you receive the Roses, give them the greatest care; never expose the roots to the drying action of spring winds for a moment. A plant with bare roots exposed to the dry air is like a fish out of water. Should the plants, through delay in transit, come dried out, as occasionally happens, soak the balls of earth and roots in water; if the stems have dried out, after soaking the ball, bury the whole plant in damp earth for several days. This treatment may put them in good condition, while if they are planted when dried out there is danger of their dying.

TIME TO PLANT. The proper time for planting in the various sections of the country largely depends, first

upon the location, and, second, upon the character of the plant. In the warm climate, southern and southwestern states, in fact all sections where frosts are infrequent and the winters mild, pot-grown as well as dormant Roses may be planted in the late fall, as well as in the early spring. In the southern states fall planting of both these classes of Roses is considered desirable, but, if the conditions are such that it can not be accomplished, then in the early spring months they may be set out with entire safety.

As to where the preference lies between plants that are pot-grown under glass, and dormant, field-grown plants, it is not easy to discriminate. Our own experience has been that in the southern and southwestern states, the planting of the one-year-old Roses during the months of February, March and April, according to the location, may be accomplished with splendid satisfaction.

MULCHING. The main object being to retain the moisture rather than to enrich the soil, cultivate the garden once a week up to the middle of July, to maintain a dust mulch; after that, a liberal covering of "long" cow or horse stable manure that will not heat will accomplish this purpose best.

HARDINESS. Hardiness in a Rose is a matter of which no one can speak with positive certainty, because the condition of the weather as a rule prescribes the hardiness of a plant, as quite frequently plants that have been out year after year will be winter killed by unusual conditions. As stated elsewhere, the hardiness of the different varieties of plants can be depended upon to be as near accurate as it is possible for any one to determine.

WINTER PROTECTION. Where the temperature gets below freezing, the less hardy Roses will require protection, and all of them will be the better for it, at least about the roots. Soon after the first frost, having hilled up the soil around the stems, cover the Rose beds all over with a 3 or 4-inch layer of good heavy stable manure, and over this a 6-inch layer of leaves, held in place by the most slightly material available. A 12-inch fence of poultry wire will keep the leaves in bounds nicely. If the leaves are not available, straw, corn-fodder and even boxes put over the Roses to shed the rains, will protect from the cold, biting winds and the alternate freezing and thawing of early spring sunshine and cold nights; but do not smother the Roses, for if too tightly covered they will die. Remove the covering gradually in the spring when danger from frost is past.

How to Prune Your Roses

Showing where to prune

Pruning is the art of improving the productive power and the appearance of a plant. It consists of two distinct operations. 1. The removal of dead, weak, overcrowded, and otherwise useless shoots. Unripe wood which in the spring will usually be found to have discolored pith, caused by the winter frosts, should be cut clean away at the base of the shoot. 2. Pruning Proper, the shortening of those shoots which are allowed to remain after the thinning-out process has been completed.

The most frequent errors made in pruning are: (1) leaving too many shoots when thinning out. (2) pruning severely the shoots of varieties which require little, if any, shortening; (3) pruning lightly the varieties which require severe pruning; (4) leaving Rose plants crowded with shoots and cutting these to a uniform length all over the plant in a similar way that a hedge is clipped.

In thinning out a shoot, it should be either cut clean away to the base of the plant, or to its starting point on the elder shoot from which it springs, as the case may be. When the plant has been pruned, the shoots should be left as nearly as possible equidistant from each other, and regularly arranged around it so that it presents a well-balanced appearance on all sides.—National Rose Society's Handbook on Pruning.

Diseases and Insects

MILDEW—This disease very frequently attacks the foliage of Roses, especially the Crimson Rambler. It is shown by a grayish crinkling appearance of the leaves and usually occurs after a change in the temperature. It

can be checked to a certain extent by sprinkling the leaves with powdered sulphur immediately after its appearance. If, however, this does not check it, dissolve one ounce of potassium sulphuret in two gallons of cold water and apply a fine spray.

GREEN FLY OR APHIS—A green sucking insect which usually gathers in great numbers upon the tips of the new growth. A solution of tobacco made from tobacco insecticide soap, which you will find offered elsewhere in this book, will exterminate them.

RED SPIDER—Is also a small insect indiscernible to the naked eye, and a frequent spraying with a strong hose is all that is necessary.

LEAF ROLLER—Is an insect of yellowish-white color, resembling the butterfly, and lays eggs on the underside of the leaf, which soon form a cocoon, rolling around itself the leaf, hence the name, leaf-roller.

ROSE BUG—A familiar insect, appears in the earliest summer, sometimes in great quantities, and is very troublesome. It is a very destructive insect and usually feeds upon the white petals, but is easily destroyed, especially in the early morning, when they will readily fall into a vessel containing kerosene. They can be poisoned, but it is not a very desirable way to get rid of them. This is to spray with wood alcohol, which will kill any insect by contact, operates quickly and does not injure the flower if applied in a mist-like spray. Care should be exercised by the operator not to inhale any of the fumes.

BLACK SPOT—A fungous disease, appearing as its name indicates as a black spot upon the leaf, eventually turning yellow and falling. It rarely occurs in the early part of the season, and the Teas are almost but not quite, exempt from its ravages. The best preventative if your bushes have been troubled by it in the past is spraying in April before the foliage has developed and not while the flowers are in bloom, because of the discoloration of the foliage. The disease usually appears at the base of the plant and works upwards, so a watch should be kept and as soon as any leaves appear affected with this disease they should be pulled off and taken entirely away from the balance of the plants. If this is thoroughly done it will usually hold the disease in check.

Grape Dust. For mildew, mold or rust mites. Price ½ lb., 25 cts., postpaid.

Bordeaux Mixture. (Dry.) For dusting plants affected with mildew and all fungous diseases. Can be used as a spray. 1-lb. box, 35 cts. (makes 5 gallons liquid); 5 lbs., \$1.25, by express.

Slug Shot. Is an insecticide for the destruction of Potato and Rose Bugs, and all Lice, Worms or Caterpillars upon Melons, Eggs, Cucumbers, Cotton, Tobacco and Cabbage Plants, Tomatoes, Currants, Fruit or Ornamental Trees, Grape Vines, Shrubs and Flowering Plants. An admirable remedy for the Black Clematis Bug.

Directions for Use: Slug Shot is an impalpable composite powder, to be dusted upon the plants. It contains Poison, thoroughly diffused through natural fertilizers, and is perfectly safe in its use to man or beast. Price, one-pound package, 25 cts., prepaid.

RUBBER PLANT SPRINKLER. Large size, \$1.10 postpaid.

Bowker's Ammoniated Food for Flowers

A new odorless Fertilizer for Pot plants. Makes plants grow and bloom luxuriantly, and drives insects from the soil.

It starts the plant at once into a healthy and vigorous growth and abundant bloom. It drives worms and other troublesome insects from the soil. It has no disagreeable odor, and is the only artificial fertilizer which can be used without danger or injury to the plants. It takes the place of liquid manure, and is just the thing that has been wanted for a long time. We have

sold tens of thousands of packages of it, and have yet to hear the first complaint. If your plants are doing poorly, get a packet and see how quickly they will be benefited. It acts like a charm. The Ammoniated Food is put up in wooden boxes, with attractive wrappers. One package, sufficient for twenty-five ordinary-sized plants for one year, for 50 cents. Sent by mail, postage prepaid, on receipt of price.

Insecticides

Thompson's Rose Nicotine is chemically pure nicotine and quick death to insects on Roses. Very convenient to use—no trouble, no odor, no staining; simply apply as directed with spray pump or plant sprinkler. Small can 30 cents, larger size, 60 cents, postpaid.

Tobacco Powder—The Sprinkling Kind for Sprinkling or Dusting Only, is made from heavy black leaf tobacco, strong in nicotine, and so finely pulverized that it can be applied with an ordinary magazine bellows gun direct to plants, indoors or out, or sprinkled around the hothouse to keep the pests in check. Price, one-pound package, 35 cents.

Sulpho-Tobacco Soap. Another splendid insecticide. Directions for use on every package. 3-oz. cake, makes 1½ gallons prepared solution, 15 cts. each; 8-oz. cake, makes 4 gallons prepared solution, 30 cts., postpaid.

Hellebore, Powdered White. For the destruction of slugs, worms, caterpillars, etc. Less poisonous than Paris green and London purple, and safer to use. Use as a powder or dissolve one ounce in three gallons of water. Postpaid, ½ lb., 40 cts.; lb. 75 cts.

Vestal's Incomparable Garden Roses

Illustration Shows Flower of Golden Orange Rose Sunburst.

New Rose Wm. R. Smith

A Vigorous, Healthy Grower, Excellent in Quality and Beautiful in Bloom.

Whether you live East, West, North or South, whether you wish one Rose or 1,000, here is a Rose which has our unqualified endorsement. It will thrive abundantly in almost any reasonable location. The flowers are large, full and double, and most exquisitely formed. The petals are so firm they look like wax, softly curled, colored cream with flesh tint tips, buff yellow base and the center a heart of pink. Perfect buds. The flowers are borne on long, strong stems, just right for making bouquets. Fragrance is delightful. You will admire the foliage, too, deep green leaves on red stems and the new growth of rich garnet; the plant will grow for you vigorously, is among the hardiest in this class and blooms abundantly. Price, one-year-old plants, 15 cents each; two-year-old plants, 35 cents each.

NEW CUSTOMERS

As this Catalogue will reach many who have never had our plants, we would urge such to send us a trial order, no matter how small, and although you may be satisfied with plants bought elsewhere, we believe our special strains of many of the newer varieties will make them as profitable to you as they have been to thousands of others who are now regular customers.

SUNBURST

"Stands Head and Shoulders Above All."

This magnificent giant-flowering Rose stands head and shoulders above all other Roses of its class. It is a constant blooming variety, producing fragrant blooms of an especially deep color throughout the summer. It has all the good points of merit; a fine long pointed bud; long stems; extraordinary vigorous and healthy, and belongs in the class of big Roses. The color is a beautiful orange-copper, golden orange and golden yellow, large intense shades, and brilliant in effect. Price, strong one-year plants, 20 cents each, three for 50 cents; two-year plants, 50 cents each.

Cherry Ripe

Beautiful, Fragrant, Hardy.

One of the brightest vivid crimson scarlet Roses in existence. Of free branching habit of growth; very vigorous and healthy. Every shoot produces a large, double, well-formed flower, which, combined with its fragrance and hardiness, makes this essentially one of the greatest red Roses for out-door planting. Price, 15 cents each; two-year-old plants, 40 cents each.

Mrs. Aaron Ward

This Rose is a real joy to the grower and absolutely distinct. One of the most delightful Roses of recent years, in a color that catches the eye at once. Coppery orange in the open bud, golden orange when partly developed, pinkish fawn of lovely shade when fully open, when it looks like a full fluffy rosette. No wonder everybody that sees it falls in love with it. Price, 15 cents for one-year-old plants; 35 cents for two-year-old.

Rhea Reid

Great New Scarlet Rose.

After many tests and observations we are prepared to say there is no crimson or scarlet Rose better than this variety and for out-door cultivation it ranks at the very top of the list. The flowers are exquisitely formed, are delightfully fragrant and the color is crimson-scarlet. Growth is wonderfully strong, sturdy and healthy, which is the important feature after all. It will succeed

anywhere and is hardy. A great Rose in the fullest sense. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Our Roses

Are grown in THREE-INCH pots.

They are superior to the young Roses from two-inch pots usually sent out because the larger pot gives ample room for root action and allows the plant to grow naturally. They are sturdy and compact and when sent by express with the soil on the roots, transplanting scarcely checks their growth. The cut shows a fair sample of the two-inch pot plants as usually sent out by the mail trade, (and a fair sample taken from our stock, growing in three-inch pots.)

50 YEARS OF
ROSE GROWING

OPHELIA

This new Rose has the brightest future, in our estimation, of any Rose introduced for the last quarter century. The color is one so difficult to describe that any description can only be a partial one, and gives but a faint idea of the superb beauty and richness of the shades. Salmon-flesh, shaded with rose. Buds of unusual attractiveness, opening full and double. The illustration conveys but a faint idea of its beauty and formation, which is of large and perfect shape. Habit excellent, growth strong, produces flowers on long stems, well up above the foliage, and in great profusion all summer. Hardy in almost all localities. Grand for forcing or outdoors. Price, 20 cents each; two-year-old plants, 50 cents each, by express.

Milady

No Rose of recent introduction has impressed us as this one. After giving it a thorough test, both indoors and out, we are convinced that it will become the most popular outdoor garden Rose in existence, combining as it does, all the desirable features of a Rose for the amateur grower, such as color, freedom of bloom, formation and hardiness. Being a cross between Richmond and J. B. Clark, it has retained the color of both, being a rich velvety crimson, with darker shading toward the center and retaining its color in the expanded bloom. Buds medium long and opening full and double to the center, producing a magnificent flower, which it is almost impossible to describe, being a perfect rose in every way. Price, 15 cents each; two-year-old plants, 35 cents each.

Standard or Tree Roses

Tree Roses occupy but little ground space and are very imposing when planted among the shrubbery or perennials. Along the sides of a walk they form an avenue effect.

The plants we offer are exceptionally choice, with sturdy roots and well-balanced tops. For best results the weak shoots should be cut out in the spring before growth starts, and the stronger ones pruned back to three or four eyes each.

White and Red Baby Ramblers, Grus an Teplitz, Ball of Snow, etc. Price, \$1.25 each by express only.

When Selection Is Left to Us

We will choose for you same as if for a personal friend, for we feel the responsibility of giving you good varieties and also first-class, healthy plants that will be sure to bloom. Mention the colors, and the quantity of each color you prefer, to enable us to select to your satisfaction.

PRICES: TEA ROSES (OUR SELECTION)

2-year size.....12 for \$3, by express

The combination of colors in the salmon-yellow Rose Ophella makes it a highly decorative variety.

FROM MAY 1 TO JUNE 1.

CHOICE PLANTS AT GREATLY REDUCED PRICES. In growing so many varieties of plants in such large quantities we can not anticipate orders and grow just what will be required of each variety to meet the demand. Now, in order to close out our surplus stock at or near the end of the season we have decided to offer them at greatly reduced prices for thirty days after May 1, or from May 1 to June 1. Persons ordering these collections will be surprised at the number and value of the plants they will contain; in fact, were we to foot them all up at catalogue prices, you would find you were getting them at less than half price. Red Radiance

HYBRID TEA. No Rose has yet equalled, certainly none has excelled Radiance as a garden Rose, when all points are taken into consideration, such as hardiness, freedom of bloom, vigorous growth and character of bloom. In Red Radiance we have an exact replica of its prototype, Radiance, except in color and bud. The color is a splendid even shade of clear red, without a trace of any other color, retaining its vividness for an unusually long time after being cut. It is a remarkable bloomer, being constantly in flower, from early spring until freezing weather. Strong, vigorous, branching grower, each branch terminating in a large, bold, double bloom. Hardy everywhere. Altogether it is a Rose destined to become one of the leading garden Roses of America. Price, 20 cents each, two-year-old plants, 50 cents each.

Hadley

In the Hadley we have a Rose that possesses a rich and lasting crimson color, coupled with vigor of growth, robust constitution, and free blooming habit. It will be welcomed alike by the grower who forces Roses under glass for cut flowers and the one who plants outdoors for summer flowers.

It is a development of a strain of red Roses, including Liberty General McArthur and Richmond. The color is magnificent, rich velvety-crimson, retaining its brilliancy throughout the season. The fragrance is delightful and refreshing. The flowers are borne on long stems and keep in good condition a long time when cut. The growth is splendid, sturdy and healthy, the foliage large and abundant. Price, one-year-old plants, 20 cents; two-year-old plants, 50 cents each.

Wellesley

"As Fine as a Rose Can Be."

Wellesley is a Hybrid Tea Rose, as fine as a Rose can be, has good-sized flowers and blooms continuously. The bud, when first opening, is a beautiful shade of bright pink and the flower retains this perfect coloring until it drops its petals. Blooms continuously the whole season through, and gives fine stems for cutting. Will stand the winters any place south of the Ohio River, but north of that line it should be protected. Price, 15 cents each; two-year-old plants, 40 cents each.

STRIPED RADIANCE

Exceptionally Striking in its Variegation.

Striped Radiance is a sport of the now famous cut-flower Rose Radiance. The flowers are large, ground color soft carmine striped and dashed with creamy-white. The Rose is extremely beautiful in its bud form, being quite long pointed. Habit of growth is vigorous and branching, and this Rose will always prove one of great interest. Really a distinct novelty. Nice one-year plants, 25 cents; 3 for 60 cents, strong two-year plants, 50 cents; 3 for \$1.25.

Striped Radiance is an interesting novelty. Everyone
should try.

The flowers of Radiance are somewhat of the June Rose type, immense in size and highly perfumed.

Virginia R. Coxe

or Grus an Teplitz.

For intense and dazzling color there is no other Rose to compare with this splendid kind. The flowers are large and handsome, moderately double, of splendid substance, and are produced in amazing profusion during the whole of the growing season; in fact, it is always in bloom. The color is fiery crimson, shaded with a dark velvety sheen, a combination found in no other Rose.

The fragrance of Virginia R. Coxe Rose is unexcelled by that of any other variety under cultivation. It is a strong and sturdy grower, often attaining a height of four or five feet, is perfectly hardy in all sections and is one of the finest of many splendid Roses that have come to us from Europe. Price, 15 cents each; two-year-old plants, 35 cents each.

RADIANCE

MAGNIFICENT ROSE

(Giant Flowering, Handsome in Form and a Wonderful Garden Rose.)

This grand, giant-flowering Rose stands head and shoulder above all other Roses of its class. The flowers, which are of splendid form, are large and full, and somewhat of the June Rose type. The buds are particularly handsome in form, the full blooms large and double, the petals of immense size and the blossoms are highly perfumed. The growth of the plant is vigorous, making strong canes which are thick and heavy. Radiance is rightly considered a leading Rose of the garden for cutting and successfully competes with many of the finest greenhouse productions as a cut-flower variety. Radiance produces a wealth of heavy, clean, dark green foliage and has the qualities that make it the ideal garden Rose. Price, strong plants on own roots, 20 cents (will bloom the first season); two-year-old plants, 35 cents each.

Mrs. George Shawyer

This is one of the newer varieties introduced by the growers of Lady Hillingdon. We have not seen a Rose that has met with such universal appreciation by both the amateur and professional grower, and has won awards in almost every place shown since it was introduced, both in this country and Europe. The color is one very hard to describe, being a shade of brilliant clear rose or bright peach-pink. It is a wonderful grower and bloomer, producing great numbers of strong shoots, each shoot tipped with a bud. The flowers are very large, well formed and full, petals of good substance. A very fine garden Rose, as well as a forcing Rose. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Mad. Abel Chatenay

Grand Perpetual-Blooming Rose.

This splendid Rose is one of the very best of its color—rosy-carmine, with darker shade. It does remarkably well in the open ground, has wonderfully beautiful flowers, which are full, deep and double. A very hardy Rose, Chatenay is a strong grower and free bloomer and has won friends wherever it has been planted. We have a large stock of superior quality, and urgently recommend all our customers to include Mad. Abel Chatenay in their Rose orders for this spring. Price, 15 cents each; two-year-old plants, 35 cents each.

Perle Von Godesberg

This magnificent Rose was originally sent out from Germany as a Yellow Kaiserin Augusta Victoria, it having all the beauty of form and substance of that great garden Rose. The color is a rich canary-yellow with shadings of saffron. The flowers are massive in size, full and double, with the petals elegantly recurved. It is one of the finest garden Roses, being perfectly hardy. Price, one-year-old plants, 20 cents each; two-year-old plants, 40 cents each.

Mrs. B. R. Cant

This Rose is an extremely strong-growing variety, producing heavy stems, with large, healthy foliage and flowers almost the equal and style of Helen Gould, but more double; deep rose, with silvery rose center. A bright, clear garden Rose, and a prolific bloomer, especially good for outdoor cultivation. Delightfully fragrant. Price, one-year-old plants, 15 cents each; two-year-old plants, 35 cents each.

Freiherr Von Marshall

Wonderfully Strong Growing and Hardy.

As an outdoor Rose it has no superior. It has wonderfully beautiful foliage and produces large, full, beautiful shaped flowers, which are borne in profusion all through the season. Magnificent crimson-scarlet Hybrid Tea Rose with long and pointed hubs; deliciously fragrant. Wonderfully strong growing and hardy. 50 YEARS OF
ROSE GROWING

BEAUTIFUL YELLOW ROSE

LADY HILLINGDON

"Everybody Can Grow It."

It has long willowy stems that are in no sense weak, as the buds are held upright; has a long slender pointed bud of brilliant deep golden-yellow, and a striking peculiarity of this Rose is that each day the golden-yellow color becomes deeper yellow and more intense, unlike all other yellow Roses of which we are familiar, as invariably the tendency after being cut is to get lighter in color. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Perle des Jardins

Pearl of the Garden.

The color is a clear golden yellow, of a beautiful shade, and is entirely distinct from any other variety; the flowers are large, full, of globular form, with great depth and substance, richly perfumed, and very beautiful in every way. This magnificent Rose still holds its position as one of the most exquisite and beautiful of its color ever introduced, and the demand for it is constantly increasing as its great value becomes known. It is ideal for cutting purposes. A particularly fine garden Rose, being strong and thrifty. Price, one-year-old plants, 10 cents each; two-year-old plants, 30 cents each.

Helena Cambier

Of unusual beauty, with large, double, beautifully formed flowers, the colors are varying, ranging from salmon-rose to coppery rose; very often a handsome saffron hue. As the flowers expand, the colors become lighter. A most remarkable sort in every respect and one to which we give our highest endorsement. Good everywhere, especially in the South. Price, one-year plants, 15 cents each; two-year, 40 cents each.

Killarney Brilliant.

It grows vigorously, blooms profusely, and is most deliciously scented. Price, 15 cents each; large two-year-old plants, 30 cents each.

The Famous Killarney Roses Killarney Brilliant

Probably no Rose ever introduced gained public favor so quickly as the original Killarney, and which today, after being on the market for over sixteen years, is still the most popular Rose grown. We sell more of it than of any other variety. Killarney Brilliant is a sport from the original Killarney, in which we have a Rose far more intense and rich in coloring. It being almost a crimson of a rich glowing shade, and in addition to its rich color it is also larger and more double than its parent. A truly magnificent Rose which we can endorse in every way. Price, one-year-old pot plants, 20 cents each; two-year-old plants, 50 cents each.

MARY COUNTESS OF ILCHESTER

In the opinion of many expert rosarians this must be classed as one of the finest novelties. Mr. Roger Murphy, who has worked with Roses for the past forty years, says: "This Rose has come to stay. White Maman Cochet

A splendid Rose: has all the good qualities of Maman Cochet. Like some other white Roses, this variety, especially in the autumn, shows pink markings on the outside petals when the flower is in bud. When open the blooms are pure white and entrancingly lovely, large, fragrant, hardy and freely produced.

Crimson Maman Cochet

(Etoile de France.)

This well known Rose we have named descriptively Crimson Maman Cochet, because of its vigor of growth, stiffness of stem, heaviness of foliage, freedom of bloom, and hardiness. Bears masses of full, deep-formed flowers singly, on long, substantial stems. The color is a new and clear shade of red or crimson-velvet, brightening in center; of exquisite fragrance. One of the best and sweetest Hardy Hybrid Tea Roses of its color.

Red Maman Cochet

(Helen Gould.)

This is a Rose that will grow and give satisfaction in almost any soil or situation. It produces its splendid flowers in amazing profusion, on long, strong shoots. For vigor and freedom of bloom, thousands of growers regard this Rose as better than American Beauty, and without a peer. The flowers are very full, perfectly double; buds long and pointed. Color is a warm, rosy crimson, hardy everywhere. The exquisite fragrance, beauty of form and hardiness of nature make it ever popular.

Pink Maman Cochet

This superb Rose is well known as a queen among Roses, one of the best and most beautiful varieties ever grown, and quite hardy. The flowers are of enormous size, very full and of great depth and substance. Color, rich coral-pink, elegantly shaded with rosy crimson; has broad, thick, shell-like petals and makes superb long-pointed buds; immense bloomer, and flowers the whole season. Deliciously sweet and a hardy, vigorous grower. It ranks among the very finest hardy everblooming Roses.

Yellow Maman Cochet

We continue to regard this grand kind as absolutely the best, everblooming yellow Rose. It is ideal for open ground culture—a typical Cochet Rose, with gracefully molded buds, flowers magnificent when open, on stiff, strong stems. This kind is identical in every way with Pink and White Cochet, except the color of the flower, which is deep sulphur-yellow.

Blush Maman Cochet

(Wm. R. Smith.)

This magnificent variety is an American-raised, pedigree seedling. It inherits hardiness, constitution, fine habit, grand foliage and superb flowers. Where there are so many good qualities, it is difficult to emphasize the leading one, but in this variety we would name its ability to resist disease. The color is a deep ivory-white overlaid with a good, bright shade of pink. As a summer Rose it ranks with the best.

These are entirely distinct from the larger flowered Roses and there is a place for both in every garden, being so hardy and adapted to so many uses. Masses of 25 or more together will be found to make a very effective planting.

Price of all Baby Ramblers listed on this page: One-year-old plants, 15 cents each, \$1.50 per dozen; two-year-old plants, 35 cents each, \$3.00 per dozen.

The Famous Crimson Baby Rambler

One of the most useful and ornamental Roses yet introduced. It blooms in immense clusters similar to Crimson Rambler, every day in the year, but grows only 20 inches high. Better than an azalea, it is superb for single specimens, dwarf hedges and for bedding. The color is clear and brilliant ruby-red; foliage dark and glossy. Free from insects and absolutely hardy everywhere.

Pink Baby Rambler

Orleans Rose.

The showiest and prettiest of the pink "Baby" Roses; this charming and dainty little variety is of beautifully rounded habit and is a huge bouquet of brilliant bloom, deep cerise, with showy center of pure white, florets not crowded, but of beautiful arrangement.

Double White Baby Rambler

A most beautiful companion to the Crimson Baby Rambler, growing to the same height, and bearing great masses of double, pure white flowers, covering the plant as with a mantle. The Roses are delightfully scented, reminding one somewhat of a hyacinth.

Baby Tausendschon

A dwarf form of the Climbing Tausendschon or Thousand Beauties. It has all the characteristics of the climber in the charm of its flowers, but blooming the entire season. Flowers firm, white, delicately flushed pink, changing to deep rosy-carmine.

Vestal's "Sunny South"

Set of four distinct Everblooming Roses shown on inside cover page.

In the "Sunny South" Collection of Ever-blooming Roses named below we offer four choice varieties especially adapted for outdoor bedding. They combine the greatest variety of form and richness of color it is possible to get in that number. All are free blooming and delightfully fragrant. For vigorous growth, freedom of bloom combined with hardiness, fragrance, healthy and abundant foliage they are unexcelled. The smallest or third size are sturdy plants from 3-inch pots and will, under ordinary conditions, give an abundance of bloom this season, but the larger sizes will, of course, bloom earlier, more profusely and should produce larger flowers on longer stems.

Mrs. George Sawyer

It is without question the most remarkable of all pink Roses. It has a shining, intense deep pink color possessed by no other Rose. It is a fine grower, free bloomer, good size and form, fragrant and in a class by itself as to color. Price, one-year, 15 cents; two-year, 40 cents.

We will supply one each of the Four Sunny South Roses in one-year-old plants, for 50 cents; one each of these fine Roses in two-year-old plants for \$1.50; or they can be purchased separately at prices named.

Erna Teschendorf f

The color of the flowers is the brightest red. The flowers are large and very double and are produced in constant succession throughout the whole season.

Mrs. Wm. Cutbush

Of dwarf growth, producing in constant profusion flowers of pale pink, borne in huge trusses throughout the entire summer and autumn. Hardy.

Bonnie Belle

Enormous trusses of dark cherry-red flowers. Unusually long buds for a Polyantha. Worthy of trial.

Geo. Elger

A superb Polyantha Rose with just sufficient of Tea Rose blood to make it different from any in its class. It produces great quantities of lovely little buds of golden yellow, opening into miniature symmetrical Roses. Each bush is so loaded with blooms that they resemble a huge bouquet. Like all Roses of this class it is free in growth and bloom, blooming all summer. Hardy everywhere with some protection. Foliage bright attractive green. Excellent companion for the Baby Ramblers.

MRS. DAVID JARDINE

A Wondrous, Hardy, Brilliant, Pink Bush Rose.

An exquisite new Hybrid Tea of a shade of brilliant pink not equaled by any other Rose. The color varies from a deep shade in the center to an exquisite salmon tint on the outer petals, with a peculiar soft, pastel effect. Its petals exhale a fragrance only to be compared to the famous Attar of Roses. The lasting quality of the flowers when cut is marvelous. They have been known to keep in perfect condition more than a week in water. A wonderfully vigorous grower, absolutely hardy everywhere, bearing its flowers in great profusion all summer. Price, one-year, 20 cents each; two-year, 50 cents each.

OLIVA

A seedling of Gen. McArthur and Helen Gould. Oliva shows the rapid, strong growing and free blooming qualities of McArthur, while in shape of flower and color it strongly resembles Helen Gould. Buds are nicely pointed—like La France—and very fully double. Deep rose color, one of the finest in cultivation. Price, 20 cents each; two-year-old plants, 40 cents each.

President Carnot

It is a Rose of the largest size, beautiful both in bud and open flower. The buds come on long, stiff stems, in clusters of from six to twelve. Each individual flower stands out distinct on its stem. No crowding as in the case of so many Roses that bloom in clusters. The color is distinct and novel, a lovely fawn, shading to pearl. It often measures five to six inches in diameter. We have no hesitation in saying that this charming Rose will become as popular as La France, as it has all the good qualities of that Rose, and at the same time is so distinct that it attracts immediate attention. It is, indeed, a wonderful Rose—one that everybody can grow and bloom. Price, fine young, strong plants, 15 cents each; fine two-year-old plants, 40 cents each.

Messrs. Vestal & Son.

Dear Sirs: The two boxes of fine plants reached me in perfect condition Saturday morning. I have been buying Roses for a number of years from some of the leading Rose growers of America, but you send out the finest bushes in the best order at the most reasonable price of any firm that I have ever ordered from, and I am sure being raised in our own climate they should do better than those raised in a different section.

You are so careful in filling orders that I find no trouble in checking out the orders.

I certainly appreciate my fine collection of Climbing Roses. I have the Ramblers as a background for these over our pergola.

Again thanking you and wishing for you greater success, I am,

Sincerely, a friend,

MRS. LESLIE COOMBS.

EDWARD MAWLEY

We have no hesitation in stating that this is the finest of all dark crimson Roses, a true perpetual flowering Hybrid Tea, and the most beautiful variety the Rose world has yet seen. The grand novelty has been very aptly named Edward Mawley, in honor of one of the best loved of British rosarians. It is an enormous, big-petaled Rose, much larger than Malanie Soupeit a Rose it resembles in form, but of the beautiful rich color of a Louis Van Houtte, only with a more velvety shading upon the inside of its petals. Price, 15 cents each; two-year-old plants, 35 cents each.

Mrs. Jas. G. Penny

This variety sported with us from Radiance some three years ago and is an exact duplicate of that variety in all respects save color. The color is a lovely shade of shell pink with a deep glowing heart of bright pink, which lights up the flower wonderfully. The growth is very vigorous and, like its parent, it is a persistent bloomer, flowering all the time. This variety has been highly commended by all who have seen it in our establishment and we have every confidence in recommending it as a first-class variety. Price, 25 cents each; large, 50 cents.

Tipperary

This Rose makes long, slender, stiff stems in a very short time, many of them to a plant, and every one tipped with a yellow flower. The bud is long and sharply pointed, and opens into a full rosette. Everyone should grow this pretty yellow, for it is a variety that will please. Price, 20 cents each; two-year-old, 50 cents each.

Alice Roosevelt

An Improved Mme. Chatenay.

50 YEARS OF
ROSE GROWING

Everblooming Climbing Roses for the South

These are the Roses so necessary for the home, giving to it, no matter how humble or pretentious, a touch of beauty not to be had by any other form of adornment. They have also a most useful side, in that they give most delightful and refreshing shade when used on the porch, veranda or pergola. They are used very extensively in covering unsightly spots in the grounds, for screening outbuildings and for trailing down over embankments.

Marechal Niel

The Famous Rose.

The fame of the superb yellow Rose Marechal Niel, with its large, deep, golden-yellow flowers, is world-wide. It is almost universally held to be the finest Rose for indoors or outdoors, where the climate admits of its cultivation. Its magnificent golden-yellow flowers are almost massive in dimensions, and reports from growers tell of single plants showing one to two thousand blooms at a time. It is of strong growth and beautiful foliage. It is grand in petal, shape, color, fragrance, lasting qualities and size, an extremely free bloomer and flowers throughout the season. Contrary to many Roses, which lose their color after opening, Marechal Niel decidedly improves and takes a deeper yellow after being kept for a day or two. The tea fragrance is strongly present in this

Rose. It is a variety which practically stands by itself. Price, 15 cents each; stronger plants, 25 cents; two-year-old plants, 50 and 75 cents.

Climbing White Maman Cochet

The Sensational, New, Hardy, Everblooming, White Climbing Rose, Long Sought For.

Just as the old favorite White Cochet is one of the very best of all White Tea Roses, so we believe this new White Climbing Tea will jump into the widest popularity. It blooms continuously all summer, bearing the greatest profusion of perfect White Cochet Roses, and the plant grows with wondrous strength and vigor. This is without doubt one of the finest white everblooming Climbing Roses ever introduced, and can be procured from very few concerns. Its scarcity makes it valuable, and it appeals strongly to those who like to have something different from their neighbors. Price, 20 cents each; two-year-old plants, 50 cents each.

Gainesborough

This is a Grand Climbing Rose. We wish all our customers could see its great beauty.

For a hardy everblooming climber it has no equal. For beauty and size we place this variety at the head of the Hybrid Teas. Its delicate colors are hard to describe, being delicately tinted flesh, almost white, and lustrous as satin. When in full bloom it resembles a large, fine, white, fluffy Peony, but without a suggestion of stiffness, often measuring eight to nine inches in diameter. Be sure and try this grand Rose; you will meet with no disappointment. Price, 15 cents each; two-year-old plants, 50 cents each.

Reine Marie Henriette

A strong growing and climbing Rose, making a grand pillar Rose in the South. Flowers full and well formed; rich, brilliant crimson. A grand Rose and a fine companion to Marechal Niel. Try it. Price, 15 cents each; large size, 35 cents.

Climbing American Beauty

Here we have the latest triumph in American Rose growing, the true Climbing American Beauty in all its promise and glory, the realized dream of every Rose grower. Just the same as American Beauty practically. Large flowers, each produced on separate stems, vivid rosy-crimson in color, with delicious fragrance. Borne in the greatest profusion throughout the growing season. Foliage tough and leathery, deep, glossy green, sun and insect proof. The youngest plants attain a height of 10 to 15 feet in a single season. Hardy and as sturdy as an oak in all localities. Splendid in the South. For single specimens, trailing over verandas, for trellises, anywhere and everywhere, this Rose will give the greatest satisfaction. Words of description can hardly do justice to this magnificent Rose. Absolutely true to name, on its own roots. Strong one-year-old plants, 15 cents each; two-year-old plants, 30 cents each; larger size, 50 cents each.

W. Allen Richardson

The coloring of this Rose is simply exquisite. The base and back of petals are a bright yellow, the center highly colored with glowing copper and rose; first class climber. We highly recommend it. Price, 10 cents each; large plants, 30 cents each.

MRS. ROBERT PEARY

A Great, White, Hardy, Everblooming
Climbing Rose (Or Climbing Kalserin
Augusta Victoria.)

The first white hardy everblooming climbing Rose. It is an offspring of that grand variety, the best pure white hardy everblooming Rose, Kalserin Augusta Victoria. The flowers are something grand; they are the equal of the finest and most beautiful cut flower Roses; of splendid substance; extra large, full, deep and double, and are produced on long, stiff stems. Buds are long and pointed. In bud and flower it is truly beautiful; has a delicious fragrance—just like cherry blossoms. If you want a quick growing, hardy climber, sure-to-bloom Rose, one that will give you flowers this season, this is the only white variety that will do it. Price, 15 cents each; large size, 40 cents each.

Climbing Helen Gould

Probably no red Rose has held its place secure in the hearts of Rose lovers for so long a period as has the beautiful Helen Gould. We now have the pleasure of introducing this famous Rose in climbing form. Everybody is familiar with the warm watermelon-red color of its charming flowers. This is a grand climber. Be sure and try it. Price, 20 cents each; two-year-old plants, 50 cents each.

Climbing Gruss an Teplitz

A climbing form of Gruss an Teplitz. Unquestionably one of the finest climbing Roses ever introduced. The color when first opening is very dark rich crimson, quickly changing to bright scarlet, shading to velvety fiery red. The flowers are very showy and handsome. Remarkably healthy and vigorous; almost immune from all diseases. Price, one-year-old plants, 15 cents each; two-year-old plants, 50 cents each.

Climbing Wootton

To our mind this great Rose is to be classed with Mrs. Robert Peary and other great climbing varieties for these reasons: It is perfectly hardy, has no weak spots, grows with wonderful vigor, blooms continuously throughout the growing season, produces flowers that are nothing less than superb, both in beauty and in fragrance. If there is such a thing as having one Rose more beautiful than another, we think this variety may be entitled to this distinction. It is a strong, rampant climber, growing in one season to a height of from ten to fifteen feet, with large, heavy, insect-proof foliage. It produces in most wonderful profusion its superbly-formed flowers, which are bright magenta-red, passing to violet crimson, richly shaded. The flowers are large, full and regular, with thick, leathery petals, and deliciously scented. Make beautiful buds. Price, 15 cents each; large size, 40 cents each.

50 YEARS OF
ROSE GROWING

Free-Flowering Hardy Climbers

Large-Flowering Types.

American Pillar

The flowers are single, of immense size, three and four inches across and very durable. They hang in immense clusters all along the branches and make a remarkable sight, a veritable sheet of bloom. The color is a dainty apple-blossom pink, while in the center of each flower is a cluster of bright yellow stamens. This Rose is as hardy as an oak tree, of very strong growth, soon covering any space allotted to it. The American Pillar is going to become as popular as the Crimson Rambler. If you want a novel and beautiful garden ornament, order this Rose. Price, one-year-old plants, 20 cents each; two-year-old plants, 50 cents each.

Silver Moon

The flowers run four and one-half inches and over in diameter, clear silver white in color, petals of great substance and beautifully cupped. The center is filled with bright yellow stamens, a very attractive feature. It is very floriferous, the plants literally covering themselves with great Clematis-like flowers. They are borne on strong stems, twelve to eighteen inches long, and are delicately fragrant. The foliage is large and abundant, bronzy-green, glossy and practically immune from mildew. Price, 20 cents each; two-year-old plants, 50 cents each.

Dr. W. Van Fleet

Dr. W. Van Fleet bears flowers which, when open, run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkably delicate shade of flesh pink on the outer surface, deepening to rosy flesh in the center. The flowers are full and double, of delicate perfume, buds pointed, stems twelve to eighteen inches, and fine for cutting. The foliage is a peculiar shade of bronze green, large and glossy, with spines a bright bronze red. The variety is a vigorous grower, immune from mildew. Price, one-year-old plants, 20 cents each; two-year-old plants, 50 cents each.

Tausendschon or Thousand Beauties

A Grand Hardy Climbing Rose.

A beautiful, new climbing Rose which has leaped into popularity by its inherent merit and beauty. The name "Thousand Beauties" is very appropriate and refers particularly to the wonderful variety of colorings found on any one plant. The flowers are soft pink at first, but as they age the most beautiful shades of carmine-rose, cerise, blush and soft white with a gleam of light yellow, soft crimson and intermediate tints; a combination of charming coloring, which is bewildering. Price, 15 cents each; two-year-old plants, 35 cents each.

Four Famous Rambler Roses

Four Colors---Pink, Red, White and Blush

Dorothy Perkins (Pink)

This beautiful new Rambler Rose is becoming even more popular than the original Crimson Rambler. And well it may, for it is indeed a finer pillar Rose than that famous variety. The growth of a single season is wonderful, its handsome, glossy green foliage being one of its strong points. The flowers, however, are its crowning beauty, being borne in immense clusters of fifteen to thirty, and possess great lasting qualities. Flowers a beautiful shell-pink, very double, with petals artistically crinkled. Remarkably pretty pointed buds. This Rose is extremely hardy and will withstand the coldest weather. We advise our friends to plant this variety where it can be allowed plenty of room, and it will give an account of itself. Price, one-year-old plants, 10 cents each; two-year-old plants, 35 cents each.

New Fiery-Red Rambler Rose

EXCELSA

A splendid new Climbing Rose, remarkable in many ways, but particularly in the brilliant fiery-red or intense crimson-scarlet of the flowers. The intensely brilliant color is accentuated by the great masses of giant trusses produced on the plants, and furthermore by the contrast with the deep green glossy foliage. The flowers are very double; they are larger than any of the Rambler Roses and borne in trusses of thirty to forty on each; the body of the flower is brilliant in color, but toward the edges of the petals they light up with a wonderful scarlet-crimson. Price, one-year-old plants, 20 cents each; two-year-old plants, 50 cents each.

White Dorothy

A White Climbing Rose of Indescribable Charm and Vigorous Growth. This wonderful Climbing Rose is so exquisitely beautiful that it is well worth all the prominence it can be given. It is a rampant grower and in a remarkably short time will cover a large trellis with its long, sturdy canes clothed with brilliant green, shining foliage of splendid texture and free from mildew or attacks of insects. The flowers are of a brilliant, glistening white and are borne in great trusses, completely covering the plant, until it resembles a snowdrift. Price, one-year-old plants, 15 cents each; two-year-old plants, 35 cents each.

Dorothy Dennison, The Blush Dorothy Perkins

Flowers of a delicate cherry pink color, which fades to a soft white; deep green foliage. Vigorous grower, perfectly hardy. Will cover a large porch or trellis in an incredibly short time. One of the most charming of all climbers. Price, one-year-old plants, 15 cents each; two-year-old plants, 35 cents each.

The Roses I received from you this spring are now all blooming in fine shape. C. W. J. Walnut Ridge, Ark.

Excelsa, New Fiery-Red Rambler Rose.

Its most important feature is its wonderful qualification for bedding, as it will stand bedding out like a Coleus; in fact, in the sunniest place it produces the highest color. Price, 15 cents each, 2 for 25 cents.

FIRE DRAGON. (*Acalpha Tricolor*). Rich and beautiful. Mottled and blotched with crimson and scarlet on green background. Foliage extra large and maintains its markings regardless of summer heat. Price, 15 cents each, 2 for 25 cents.

KUNTHIANUM. Called Confederate Lily. A larger plant than preceding, as leaves often grow 4 inches broad and 4 feet long. The flower stalk rises 2 1-2 to 3 feet high, and is crowned with an umbel of 15 to 25 buds, of which there are from 3 to 6 in bloom all the time, and the cluster lasts a week or ten days. The flowers are trumpet shaped, hanging down in a lovely cluster; each flower is about 10 inches long and opens 3 or 4 inches. Nothing is more showy than this grand plant during late winter or early spring, bearing large flowers of intense crimson with a delicate white feather in each petal. Price, extra large bulbs, 35 cents each.

AMARYLLIS VITATTA. These are the finest of all Amaryllis, taking their place beside the Auratum Lily and some tropical orchids. The flower has six lovely petals of thick, crisp, velvety texture, they are rounded, wide and open wide, till the finest flowers are eight and ten inches across. The petals do not curve tightly back as in the Auratum Lily, nor remain nearly closed as in the trumpet of the Easter Lily, but just open wide. The colors are red and white, and the reds vary from a deep, vivid, glowing crimson, the color of arterial blood, up through fiery scarlets which burn resplendent to an almost true orange, the color of light and passion combined, then with less yellow and fainter, they shade into lovely pinks. Price, large bulbs, 35 cents each.

AUREA NANA. It is admirably adapted for ribbon lines, carpet bedding, or massing front lines in foliage beds. It is of compact growth. Color of foliage, bright golden yellow.

BRILLIANTISSIMA. Crimson, scarlet and pink. Its gorgeous color gives it the name of "Rainbow Plant."

PARYONCHOIODES MAJOR. It is the Alternanthera so largely used in all ornamental carpet gardening. It grows only about six inches high, and can be kept much shorter by shearing it. The color is as bright when first planted as at any other time, and this is kept constantly. The color is brightest carmine.

Banana Orinoco

Mammoth Leaved Rex Begonias

"The Most Decorative of the Begonia Family."

The Rex division of the Begonia family has been a great favorite. In no other class of plants do we find the rich metallic foliage, lustre and various colors so satisfactorily blended as here. We find colors of bright green, silver colored reddish bronze, as well as varieties of bright rosy plum color. The plants are grown exclusively for the great beauty of their foliage, as they make unexcelled pot plants. The Rex Begonia dislikes our dry atmosphere and bright sunshine, and thrives best in a rather shady and moist situation. The soil should be as near as possible of the nature of a mixture of loam, sharp sand, and well rotted cow manure. The soil should be light and porous. Price of Rex Begonia, good, strong established plants, 20 cents each; 3 different varieties for 50 cents; \$1.75 per dozen.

Single and Double BEGONIAS, Tuberous Rooted

"The Ideal Plant for Shady Places—Nothing Can Surpass Their Brilliancy of Colors."

These are among the very handsomest of our summer-blooming plants, flowering throughout the season in any nook or corner. Nothing can exceed the brilliancy of their colors, the delicacy of their tints, the richness of their waxy flowers the gorgeousness of their effect in masses, or their graceful appearance in beds or borders. From the time the first blossom appears until all growth is stopped, they are never out of bloom; great waxy flowers from three to five inches across. On the approach of cold weather they should be taken up, and the bulbs stored away in a warm place until the spring, when they may be started in pots before planting in the garden. We offer double and single flowering bulbs in five colors; white, orange, pink, yellow and crimson. 15 cents each; 2 for 25 cents; 6 for 75 cents; \$1.35 per dozen.

Beef steak Begonia

Sometimes called the "Strawberry Leaf" Geranium; very ornamental; leaves silver top, red underneath; very pretty flowers. Each, 20 cents; 3 for 60 cents.

PRESIDENT CARNOT. A remarkable strong growing variety; foliage very large; flowers beautiful coral red, in large pendant panicles.

but still keeping its shape so as to make a very attractive winter house plant. The flowers, when first opening, are bright cherry, changing to clear coral red.

The ferns are
dandies.

M. Cochran,
Eudora.

Begonia Marguerite.

Begonia Haageana.

The Beautiful Begonia Templinii

Its large, glossy metallic-green leaves are profusely and irregularly blotched and mottled with the various shades of yellow, from rich lemon yellow to creamy white, beautifully tinged and flushed with most delicate flesh-pink, deepening toward the margin to the richest crimson; the most remarkable combination and blending of colors ever found in a Begonia or any other plant. The under side of the foliage and stems are coppery crimson in color; becoming very bright and vivid when grown in strong sunlight. Because of the wonderful variation, blending, and brightness of colors it might properly be called

The Rainbow Begonia

The vivid colors and markings of the leaves, remarkable beauty and symmetry of the plant, make it a valuable acquisition. It must be seen to be fully appreciated. Price, nice plants, 50 cents.

Begonia Rubella

A very ornamental Indian species, belonging to the Ricinifolia section. The leaves are irregular and blotched red, on a pallid ground; rib is banded with a purplish-brown, under surface red. This makes a grand specimen plant and will enrich any collection of Begonias. The flowers are borne on strong stalks one foot above the foliage, in large panicles of pink and white. A superb Begonia. Price, 30c each.

Begonia Haageana

A shrubby variety, good grower and free bloomer; leaves triangular; under side of leaf and stem hairy; the surface of a lustrous metallic or bronze color, veined darker, flowers white. Price, 20 cents each.

These beautiful small flowered varieties are again coming to the front, and are certain to become popular for outdoor bedding purposes. They are absolutely hardy, and produce an abundant, almost lavish, profusion of blooms, and the plants lend a coloration to the garden just at a time when other plants have been destroyed by frost. Frost does not materially affect the flowering. The collection embraces all the leading colors, and, with but a slight covering of leaves or coarse stable litter during the winter, will take care of themselves after once planted.

The New Everblooming
Pelargonium

Easter Greeting

The flowers of Easter Greeting have the large size and the gorgeously rich coloring of the "Lady Washington Geranium." To this is added, in Easter Greeting, the habit of continuous blooming, which has made the ordinary bedding Geranium so highly valued. Easter Greeting is the first of a new race and one of the most valuable introductions in recent years. As an Easter plant it rivals the Azalea; but unlike the Azalea, Easter Greeting will remain in full bloom all summer. Each, 20 cents; larger, 50 cents.

Hibiscus Sub Violecea.

New Marguerite

MRS. F. SANDER. Unlike all other Marguerites, its color is of the purest glistening white throughout; in size it frequently measures five inches across; the center of the flower is a mass of closely arranged fringed florets; these are surrounded or edged by the broad, shining white ray-petals, forming a flower which reminds one forcibly of a glorified double Pyrethrum. These are produced on long stems with a freedom not known in other varieties of the Marguerite. Price, young plants, 15 cents each; four for 50 cents.

Pelargonium Easter Greeting.

Pansy Geranium

They are suitable alike for winter blooming or for growing outdoors, either in beds or in pots, boxes or vases, as the case may be. A collection of flowering plants is not complete without Fuchsias, and the extremely low price at which splendid sorts are offered permits of a choice collection of different varieties. THE CARDINAL CLIMBER

We consider it the most beautiful, brilliant and distinct annual climber introduced in many years. It is a strong and rapid grower, attaining a height of 30 feet or more, with beautiful deeply lacinated foliage and literally covered with a blaze of circular fiery cardinal-red flowers from mid-July till frost. The flowers are about 1½ inches in diameter, and are borne in clusters of 5 to 7 blooms each. We feel sure that it will become one of the good annual climbers of the future. Like other Ipomoeas it delights in a warm, sunny situation and good soil. Price, 15 cents each; 4 for 50 cents.

Giant Moonflower

(Ipomea Maxima, Wonderfully Fragrant.)

A decided improvement over the old variety Ipomea Grandiflora. The flowers are more than twice the size of the old variety and are produced in such wonderful profusion that they completely cover the vine with a veil of glistening white. Price, large growing plants, 15 cents each; two for 25 cents; six for 60 cents; \$1.00 per dozen.

Our Superb Pansies

Pansy plants planted in the spring as soon as the frost is out of the ground will begin to bloom at once, and afford daily pleasure for a month before Coleus or Geraniums could be even planted. If snow should fall after planting they would not be hurt. In fact, to get the best results from Pansies, they should be planted just as early as they can be. To get best results and extra large flowers, the soil must be extremely rich—we use equal parts well rotted manure and soil. Price, 5 cents each; 50 cents for fifteen; \$2.50 per 100.

The Crab Cactus

A splendid old favorite. Bears large, rosy crimson flowers and continues in bloom a long time. Each, 25 cents.

Heliotropes

Four Grand New Varieties.

Heliotropes are universal favorites on account of their delightful fragrance and flowering equally as well as bedding plants in the summer, or as pot plants in the house during the winter. A bed filled with them produces a mass of color that can hardly be equalled by any other kind of plants. Indeed, there is nothing that will give so many sweet-scented flowers all through the summer as Heliotropes. They can be potted up in the fall and will flower more or less all winter.

ALBATROSS. Large panicles of pure white flowers in great profusion all season; the best white variety to date.

HEAVENLY BLUE. Large, close panicles of exquisite light blue flowers, with white eye.

LAVENDER QUEEN. Very large trusses of a beautiful shade of lavender, suffused with rosy mauve.

ROYAL PURPLE. Color deep violet purple, with white eye. Price, 15 cents each; four sorts for 50 cents.

Impatiens

(Sultan's or Zanzibar Balsam.)

Charming plants for the decoration of the conservatory or window. Price, 15 cents each; two for 25 cents.

Blue Dawn Flower (Ipomea Learl.)

A strong, vigorous climbing vine, with lovely, large, bell-shaped flower of pure heavenly blue. The flowers are borne in astonishing profusion. Price, 15 cents each; \$1.25 per dozen.

Dusty Miller

Almost too well known for a description. This is the old Dusty Miller used for edging beds of Coleus, Geraniums, Cannas, etc. Leaves silvery white. Price, 5 cents each; 50 cents per dozen.

Trailing Houseleek

Beautiful light green foliage, and yellow flowers in masses; much used for edging and carpeting bare spots, especially in cemeteries. Price, 10 cents each; \$1.00 per dozen.

Madagascar Periwinkle or Vinca.

Madagascar Periwinkle or Vinca

BEAUTIFUL DECORATIVE FERNS

These beautiful plants for home decoration vie with the Palms for first place in the esteem of flower lovers. They are finely cut and oddly shaped. Ferns give a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Nephrolepis family, of which the well-known Boston is a member, has furnished us many beautiful species of late years. We recommend all the varieties listed.

THE BOSTON FERN. This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than the Sword Fern, and do not stand so stiff, but droop gracefully. Excellent for making large specimen plants, also for hanging baskets. Price, nice young plants, 10 cents each; larger plants, 25 and 50 cents each.

COMPACT SWORD FERN. Fitting companion for the Boston; dwarfer, more erect in growth, much darker shade of green, very gracefully arched. Very desirable as a house plant. Price, 15 cents each; larger, 30 cents each.

WHITMANII. We think this the most popular Fern. Rather dwarf in growth, but graceful, very compact, dense and feathery. Each frond or branch has a double row of perfect little fronds set at right angles to the mid-rib, and so thick they seem almost crowded. It is a healthy, vigorous grower, constantly unfolding fresh fronds of light green that contrast exquisitely with the deep green of the older fronds. It is somewhat like Barrowsii, but decidedly more fluffy, more delicate and beautiful. Fine young plants, 15 cents, 25 cents and 35 cents.

PLUMED SCOTTI FERN. (*Nephrolepis Scholzei*). The ideal plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti, possessing all the merits of that most popular variety, but with the pinnate sub-divided, giving it an airy, feathery appearance. Price, nicely shaped plants, 15 cents; larger sizes, 30 and 75 cents.

"HEIZERII." This magnificent Fern has never before been offered for sale by any florist or catalogue firm. It is a sport from the now famous Teddy Junior Fern, and while its habits of growth are to produce a shorter frond, it retains all the valuable characteristics of the parent plant. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. Price, 20 cents each; larger, 50c each.

"Teddy Junior" Fern.

Asparagus Ferns

Their beautiful sprays of lovely, feathery foliage can be cut freely for bouquets, etc.

ASPARGUS SPRENGERI. Emerald Feather. Very valuable for vases and baskets. A strong, vigorous plant, very easily grown and requires little care. Price, 15 cents and 25 cents each; extra sizes, 35 cents and 50 cents each.

ASPARGUS PLUMOSUS. Climbing Lace Fern. An extremely graceful window climber. The fine, feathery foliage is always bright and green. Price, 15 cents and 25 cents each; extra sizes, 35 cents and 50 cents each.

Moss Fern

(*Selaginella* or *Lycopodium*.)

Much used in fern dishes or grown up in four or five-inch pots. Its foliage is always fresh, green, very delicate and beautiful, lace-like. A bright, green creeper that in a short time completely covers the pot, and will spread on to anything within reach. Price, 10 cents each.

New Fern John Wanamaker

"The Wanamaker Boston Fern."

Originated from Scholzei, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholzei, and therefore does not decay in the center, and is a durable house fern. It is a rapid grower, making an abundance of fronds, and is quite distinct from any other Fern. Price, nice plants, 30 cents each; larger plants, 50 cents each.

TEDDY JUNIOR. New dwarf Fern. Fronds are broad and beautifully tapered from the base to the tip, drooping just enough to make a graceful plant. Produces nearly four times as many fronds as any other Fern introduced. Compact, vigorous and thrives under most any condition. Price, 15 cents; large, 40 cents.

Heizerii.

PARLOR FOLIAGE COLLECTION.

4 Strong Plants for only 50c, postpaid.

In this collection we give you a strong plant of the best of all Ferns, "Whitmanii," also a plant of the new Fern "Scholtzi," together with a Boston Fern and a plant of the Lace Fern, for 50 cents.

HOW TO ARRANGE CANNAS IN A CIRCULAR BED

Get the tallest-growing varieties in the center, and then carefully grade each succeeding circle, using dwarf kinds for the outside. Plant one Canna in center of bed, next six Cannas 18 inches apart in a circular row 18 inches from center. For each succeeding circle use six more Cannas than were used in the previous circle and make 18 inches farther away from the center. A 10-foot bed thus planted will contain 1 Canna in center, 6 in first circle, 12 in second circle and 18 in outer circle, all 18 inches apart.

Large Double Flowering Paeonias

Once planted they will last a lifetime with little care. They grow from one to three feet high, producing magnificent blooms, which sometimes almost surpass the beauty of the Rose. Paeonies will succeed in most any kind of soil, but give best results when planted in a deep rich and somewhat moist loam.

HOME GROUNDS BEAUTIFUL

Collection of Hardy Shrubs and Perennials.

How often during the spring months in passing up or down the streets of your village or city, or possibly somewhere through the country, have you been attracted by some fine flowering shrub in all the beauty of its new dress of bright green leaves and brilliant showy flowers? Or maybe it was a climbing vine or rose gracefully draped over some trellis or porch entrance, or a tastily arranged bed of perennials or herbaceous flowers on the lawn, and you mentally resolved then that next spring you were going to have something like that for your home; and then, because you did not know just what to get, neglected it until too late for planting them out.

Now we are going to offer you not one, but a combination of all these things and at a price you never thought of. They are all hardy, nicely formed plants, well rooted and with a little care will make a fine showing in a year or two.

There are six flowering shrubs in this collection, all fine foliage and free bloomers, and the very best of their class. Two climbing vines, one climbing and one bush rose, and 13 hardy perennials. No tender plants among them at all. Every one perfectly hardy and once planted out require but little care. Here is the list. You will find them all described elsewhere in this catalog.

These plants and shrubs will thrive practically anywhere in the United States, and will be an ornament anywhere. They should, of course, have fairly good soil and a fair supply of moisture. They will do best planted in the early spring, the earlier the better. We would not advise planting later than May 10. They could also be planted in the fall in October or November. With most people, however, spring will be the best time. Don't crowd them too much in planting. Give them plenty of room. A young plant doesn't look very big and the temptation is to crowd them, but when they grow two or three years and make big clumps you will have to do some moving. We can not change the assortment in these collections, as we can make this low price only by putting them up in big quantities all the same.

Selected Vegetable Plants

This page and the next one tells you how you can have a successful vegetable garden without waiting for seeds to grow. If you buy the plants from us, ready started, you gain over a month, and have a supply of fresh, crisp, choice vegetables for your table almost before you know it. What a joy it is to step out from your kitchen door and gather from your own yard the vegetables you want, in all their original freshness and delicious goodness!

A few Artichokes—some choice Tomatoes—a sprig or two of Parsley—possibly a Cabbage or Cauliflower—and there's your meal. Such vegetables are not dust covered. Not dried and withered. Not stale and unappetizing. Not handled three or four or five times before they reach you. But clean—and palate-pleasing—right from your own garden to your own table.

You don't need a lot of ground in which to grow a home supply. A few square feet of garden is enough. Order a few plants of the varieties you prefer and you will have fresh vegetables at your command all the year round.

When plants like these are so easily grown—and when the cost of living is so high today—we can not understand why every house-wife does not grow her own vegetables. The cost of growing is practically nothing—and one can not buy such Vegetables as one can pick from one's own garden patch.

The color of the florets—fired—is strengthened on account of the density of the florets and spikes, thus presenting almost solid columns of brilliant red, effectively contrasted against the healthy, rich green foliage. The fragrance is delightfully rich and powerful. For cutting it is perfection, remaining fresh for 8 to 10 days in water.

VESTAL'S BEAUTIFUL SWEET PEAS

OUR NEW MIXED SWEET PEAS. This surpassing mixture includes the very finest and most distinct varieties now in cultivation. No strain offered will give better results and all who buy will be more than pleased.

Vestal's "Prize" Mixture

This mixture contains the very cream of the newest and standard sorts, including all the best new Sweet Peas in existence. It is made up entirely of separate named sorts, carefully proportioned as to its composition, and we can safely say, "There is no better mixture in existence," no matter at what price or under what name it may be offered. Delicately tinted and of the most exquisite fragrance. Popular with all lovers of flowers. Price, per packet, 10 cents; one ounce, 20 cents; one pound, \$2.00.

Large Flowering Sweet Peas

(Improved.)

We offer below a list of the best varieties of Sweet Peas now grown. In our selection we have the clearest, most distinct shades—that stand in the sun—and do not fade quickly when cut. Get a splendid supply of new seed, as nothing can be more satisfactory. Sow seed as early in the spring as ground can be worked, so that plants get an early start. Cut blooms as fast as they appear, which prevents them seed-ing. Seeding stops the blooming. Price, per pkt., 5 cents, seven pkts. for 25 cents.

DOROTHY ECKFORD. The grandest pure white yet introduced. Extra large flowers, beautiful shell shape; purest white. Vines produce an enormous amount of bloom.

JANET SCOTT. This might almost be called a new shade of rich pink. The unusual size of the wings give the flower an enormous size.

SUNPROOF SALOPAN. Finest, most brilliant scarlet, never changing colors.

KING EDWARD VII. Most gorgeous large flowers; rich blood-scarlet; new and unrivaled.

BLACK KNIGHT. Large flowers of the finest texture; a bright shining redding-maroon, very striking. A very desirable color.

SYBIL ECKFORD. Delicate blush pink and lemon yellow, changing to pink.

ST. GEORGE. Rich salmon-orange; very brilliant.

LOTTIE ECKFORD. Large blossoms, shaded light blue on white ground, edged purple; new.

CAPT. OF BLUES. A grand flower of bright indigo-blue; the wings are a lighter shade of blue, extra large flower.

"Superb Spencer" Mixture

A grand, large flower of finest form and most beautiful coloring. The flowers are not only of extremely large size, but are distinct in having the outer edges of the standard and wings beautifully crumpled or waved. The coloring is a silvery-white, suffused with soft rose pink, which deepens at the outer edges. Nearly all colors of the solar spectrum are harmoniously blended in a poem of tints and shades. A bouquet of these handsome flowers is an ornament magnificent to behold. In size, form and coloring, Countess Spencer is simply exquisite, beyond power of words to describe. Price, per packet, 15 cents; ounce for 40 cents.

Salvia

The Salvia is now a standard bedding plant, and well deserves its honor. Seed is best started under glass, though self-grown seed frequently comes up in great numbers where a bed of these plants has been the previous year.

SPLENDENS. Large, scarlet; exceedingly showy and useful for cutting and for ornamental beds. Price, per packet, 10 cents.

New Salvia, "Scarlet Dragon" or Fireball

A new dwarf, extra early flowering variety. The plant itself rarely grows over a foot high, while the erect spikes of brilliant scarlet flowers average a foot in length, making the total height of the plant when in full bloom between 20 and 24 inches by about the same in diameter. SUPERIOR VEGETABLE SEED

Vestal's Superior Vegetable Seeds for Home Gardens

Seeds of Superior Quality and Strong Vitality.

As to Our Packets of Seed. The average packet selling at 5 cents postpaid is too small. We, therefore, prefer to put up a more liberal quantity and sell at 10 cents. This is very much more satisfactory, both to you and to us. All seedmen have now adopted the rule of selling all seed by the pound. A quart of Beans or Peas is equal to about two pounds.

Beans, Dwarf Bush or Snap

Pkt., 15 cts.; lb., 50 cts.

VESTAL'S IMPROVED EXTRA-EARLY RED VALENTINE. Unexcelled for snaps. Preferred by many to the wax varieties. Vigorous-growing vines, bearing many long, roundish pods, deeply creased; fleshy, crisp and tender. The Beans are fairly large, pink, marked with red. This variety maintains all the strong points of the various Valentine strains now on the market.

VESTAL'S STRINGLESS GREEN POD. Very early and productive, handsome and of first quality. A fine variety to plant for successive crops; may be grown in this way until killing frost. Pods average 6 inches or over in length; round, thick and meaty, entirely stringless even at maturity.

NEW EMERALD BEAUTY BEAN. The Emerald Beauty is a flat green-podded bush Bean, a prolific and continuous bearer, the first in spring and the last in fall. It is absolutely stringless, very tender and delicious flavor. The plant is of remarkably handsome and thrifty growth. The rich green pods are of immense size, thick, broad, extra long; uniform shape, solid, meaty and of high quality.

Wax Pod Bush Beans

Pkt., 15 cts.; lb., 50 cts.

IMPROVED PERFECTION GOLDEN WAX. A medium early variety and a heavy cropper, on vines of vigorous bushy growth, with good rust-resisting nature. The pods are golden-yellow, fleshy and solid, brittle, waxy texture and have an exquisite rich butter flavor, excellent for home and market garden. May be sown any time to early fall with the assurance of a good crop.

NEW DAVIS KIDNEY WAX. The King of Flat Wax Beans. Surely time, energy and brains have culminated in this, one of the grandest Flat Wax Beans. A beautiful form, handsome long pods, attractive color, luscious flavor, prolific yielder, rust proof, excellent shipper, making this grand Bean a perfect success.

LAZY WIFE'S. The pods, of medium dark-green color, measure from four and a half to six inches in length. They are broad and retain their rich, tender, and stringless qualities until nearly ripe. Each pod contains 6 to 8 round white beans, which make excellent winter shell beans.

CUT-SHORT, or CORN HILL. An old variety, excellent for planting in hills of corn. Round, slender pods, well-formed, with small white Beans flecked with red. Very prolific and good.

Beans, Pole or Running

Pkt., 15 cts.; lb., 50 cts.

KENTUCKY WONDER, or "OLD HOMESTEAD." The pods, seven to nine inches long, are so fleshy that they are greater in width than in breadth, being deeply creased or "saddle-backed." They are solidly meaty, stringless when young, and of finest quality. If pods are gathered as they mature, the vines will continue to bear to the end of the season.

WHITE CREASEBACK. A popular early green-podded pole Bean for snapshoots; of rapid growth and very productive. Pods grow in clusters and are from five to six inches in length, perfectly round, being deeply creased or "saddle-backed." They are solidly fleshy, entirely stringless, and of fine quality. The dry seed is pure white and excellent for winter use.

ECLIPSE. Roots globe-shaped, deep red, with sweet, fine-grained flesh.

Early Summer Cabbage.

Brussels Sprouts

Pkt., 10 cts.; oz., 30 cts.; ¼ lb., 80 cts.

This interesting plant bears a stalk perhaps two feet high, closely covered with little buds or sprouts, one to two inches in diameter which resembles tiny heads of cabbage. These are tender and delicious when creamed the same as cabbage.

Pole Lima Beans

Pkt., 15 cts.; lb., 50 cts.

EARLY LEVIATHAN. This will not only give large Lima Beans earlier than any other strains, but is also much more productive, both early and throughout the season. It is a strong grower, clinging well to the poles, and is a sure cropper. The pods differ from those of other early pole Limas in being straighter and longer. The pods hang out from the foliage in large clusters and contain three or four and sometimes five large beans to the pod.

KING OF THE GARDEN. A strong grower and uniformly large podded. The pods frequently contain five to six very large beans. These beans are of excellent quality, easily shelled; large, handsome appearance.

Chinese or Celery Cabbage

This vegetable is called Pe-Tsai, or Cut Cabbage, by the Chinese gardeners, and is beginning to attract attention in America. It does not form a cabbage head, but when grown to its full size resembles the Cos Lettuce, and the outer leaves may be used during its growth. The flavor is mild, and it is used either as a salad or cooked. Pkt., 10 cents.

Cauliflower

Pkt., 25 cts.; ¼ oz., \$1.00; oz., \$3.50.

EARLY SNOWBALL. Produces large, handsome heads, measuring eight to ten inches across; pure snow white; close, compact and of the finest quality. The stalks are short, of compact growth, and can be planted closely. It is extra early, a very certain header, and equally good for a late crop. Unsurpassed by any strain offered.

EXTRA-EARLY ERFURT. The plants may be depended upon to form large, firm white heads; very early.

Collards

Pkt., 10 cts.; oz., 30 cts.; ¼ lb., \$1.00; lb., \$3.00.

GEORGIA SOUTHERN, or CREOLE. Forms a large, loose, open head, or a mass of leaves on a tall stem. Freezing does not injure, but rather improves their quality. Sow thick in drills, in rich ground, transplanting when four inches high, or sow in drills where the plants are to remain and thin to two or three feet apart in the row when of proper size. In the South sow from January to May, and August to October.

Cabbage Seed

Pkt., 10 cts.; oz., 60 cts.; ¼ lb., \$2.00; lb., \$7.00.

EXTRA-EARLY JERSEY WAKEFIELD. Best early variety. Heads of medium size, pyramidal, pointed, firm and solid, with few outside leaves; uniform in size and time of maturing, and of good quality.

LARGE JERSEY or CHARLESTON WAKEFIELD. Has uniform heads much larger than Early Wakefield, and matures a few days later. Does as well on clay ground as on other soil. Very popular with Southern gardeners.

ALL HEAD EARLY. For uniformity, reliability of heading, size, earliness and quality it is very superior. Its heads grow compact and free from spreading leaves.
